UBIQUITOUS LEARNING: FIFTH INTERNATIONAL CONFERENCE
I-Hotel and Conference Center Urbana-Champaign,
Illinois, USA
12-13 October 2012
 www.ubi-learn.com

We are pleased to announce the Call for Papers for the Fifth International Conference on Ubiquitous Learning. The Ubiquitous Learning Conference examines the ways in which the affordances of new technologies are changing how, where and when learning takes place. It considers, for example, how computing and networking devices might benefit learning not only in the classroom but well beyond the times and places traditionally considered the purview of education.

The 2012 Ubiquitous Learning Conference will be held in Urbana-Champaign, Illinois, one of the primary nodes in the American Midwest's "silicon prairie," a region known for its concentration of high tech companies and institutions. Urbana-Champaign is the home of the University of Illinois, a pioneer in digital technologies and on-line learning. The University is the birthplace of Mosaic (the first graphical web browser), the National Center for Supercomputing Applications, and the Blue Waters petascale supercomputer. Its academic and research programs continue to be at the forefront of developments in hardware, software and digital pedagogy. In addition to its on-campus students, the University of Illinois also enrolls students from around the world in a wide variety of on-line courses and programs. Given Urbana-Champaign's important -- and continuing -- role in digital learning technologies, it is an especially relevant venue for the 2012 Ubiquitous Learning Conference.

The Conference welcomes participants from many countries and professional areas, including teachers, administrators, researchers, university faculty, managers and others interested in the possibilities of technology in learning. Each day features plenary presentations and a variety of parallel sessions. Proposals may be submitted for 30-minute paper sessions, 60-minute workshops and 90-minute panels. If you are unable to attend the conference in person, virtual registrations are also available. Presenters may submit their papers for publication in the peer refereed 'Ubiquitous Learning: An International Journal.'

The deadline for the next round in the call for papers (a title and short abstract) is 6 March 2012. Future deadlines will be announced on the conference website. To learn more about paper session options and how to submit a proposal, please see the Call for Papers: http://ubi-lear n.com/conference-2012/call-for-papers/
.

We hope to see you in Urbana-Champaign in 2012.
