International Journal of Child-Computer Interaction

General Call for Papers - *(no deadline)*

The *International Journal of Child-Computer Interaction* serves as a forum to communicate original, high-quality research in child-computer interaction and interaction design and children. IJCCI employs a single-blind review process, utilizing a minimum of two (2) referees. The journal welcomes contributions on   the
 following
topics:

  - new methods for working with children in design, evaluation and research;
  - models that help designers and researchers better understand children and their relationships with technology;
  - interaction design cases that demonstrate novel and well designed technologies for children;
  - studies of how children interact with and through technology;
  - research about the use of, and the design of, technologies for play, learning, sociality and communication;
  - reviews of the literature, theories around child development and technology design;
  - studies of gaming and the application of serious games theories to children's technologies;

  - evaluation studies of new and emerging technologies designed for children.
